Situation Appears Brighter With Day's Development

With Duy's Development

The situation, so far as the MidContinent field is concerned, appears to have improved greatly after
a day in which there has been confurences over the long distance with
New York and the connensus of
opinion last night was that President
frensen of the Tidewater knew what
be was talking about when he said:
"A reduction of 50 cents in price
of Pennsylvania crude was made to
bring it in line with Mid-Continent
tende, as many castern and western
retineries have found it cheaper to
purchase high grade Mid-Continent
trude at \$2 a barrel and pay transportation than to buy Pennsylvania
crude at \$4 a barrel, the former
price. Reduction in Pennsylvania
crude, he says, does not necessarily
indicate a cut in Mid-Continent
prices.

"Domestic and foreign oil demand has undergone a slight seasonal de-cline and I do not look for a big demand during the early months of

But there is another angle to the situation, so far as the New Yorkers are concerned, and many of them are more anxious to put over a few deals than to see the price remain stable. There is a disposition among some of the larger concerns to see an opportunity to make purchases here than to see the continuation of

here than to see the continuation of the present market price.

Reports from outside fields are much encouragement to the oil men here, as there is no doubt that the well at Orange, Texas, has been overestimated by about 15,000 bar-rels, and that the other fields that are showing a great deal of oil are also showing a great deal of water. This has steadled the situation here mightily.

Giving the Admiral Credit

The Century Magazine in a recent number has a story about Arthur Hornblow, fr., formerly an army intelligence official, describing in detail how the story of the armistice. which had not yet been signed, was first made public and how, as every-body will remember, it set the good people of the United States, and

Lences-Supplies-Production, Ets

country as it is extremely doubtful if any newspaper man was ever thus protected before or since. Roxana Deep Test

The Roxana Petroleum company No. 1 H⁰race Cole in the northwest quarter of 24-17-2w. Logan county, is drilling in black state at 3.795 feet, and making about a quarter of a baller of water per bour. They are drilling in a five-inch hole and the well is listed a fallure.

Peters-Chestnut and Smith Well Shot

Evidently a Failure

C. B. Peters and Chestnut & Smiths' corporation Osage well No. 14 in 13-23-8 is flowing 50 barrels per hour, the result of a shot in the Bartlesville sand, topped at 2,150

Friedman & Cohen Have Big Burbank Producer

Louis Friedman and Aaron Co-ben's test in the southeast of 6-26-6. Burbank poel, which was flowing 50 barrels per hour natural yesterday from the regular Burbank pay, was to have been given a 150-quart shot late in the afternoon. A later report is looked for with interest.

Osage Lessees Hold Meeting

The annual meeting of the Osage Oil & Gas Lessees association was held yesterday, and the dis-cussion which lasted nearly all day

was held yesterday, and the discussion which lasted nearly all day was in regord to the 25-cent presimum being paid by the Guif Pipe I Line, and the desire on the part of the department to collect royalty payments on the basis of this presimium.

The rule is that royalties must be paid at the prevailing market price, and the question is whether the price paid by the Prairie Oil & Gas Co. is the prevailing price, or the price paid by the Guif, should be made the basis of settlement.

The present officers and the board of directors were re-elected with the exception that C. B. Peters was elected in place of T. J. Leshy, and Frank Breene is president and has held the association to its work in a most satisfactorily manner.

Another meeting will be held January 11, at which time the discussion of bids that were rejected following the rocent sale, will be taken up and arrangements made to attend the hearing in Washington on the 19th of the month.

News From Tonkawa Field; Comar's No. 2 See, Burns

By The University Preparatory School Press Club, Tenkawa, Oklahoma, Special to The World. which had not yet been signed, was first made public and how, as every-body will remember, it set the good people of the United States, and of Tulsa in particular, in a frenzy of excitement.

It seems that the author, Mr. Hornblow, fr., was stationed at Bress and that it was part of his duties to entertain newspaper men, as from them he gained much information useful in the secret service. It so happened that on the morning of November 7 Roy W. Howard, president of the United Press, arrived and the subject of the satus of the war, as it was then reaching its most important climax, came up between them.

The author describes at longth the unusual circumstances that brought about the story's being sent by Howard over the cables, which were being censored strictly, and while this is all very interesting, it is especially of interest to Tulsa people because the author gives Admiral Henry B. Wilson, the father of Mrs. Col. Pat. I. Hurley.

Holds Hearing on Colorado River Development Project

Secy A. B. Fall and A. P. Davis we

Water for more than half a million acres of arid land, flood control for the lower Colorado river basin and the development of one million horse-power electrical energy that would serve cities of the acuthwest coast, are involved in the project of the interior department to creet the highest dam in the world at Boulder Canyon, below the Grand Canyon, on the boundary of Arizona and Nevada. Secretary Fall has just held a hearing at San Diego, Cal, where delegations representing several western extent.

Cities, communities and civic organizations throughout the region came into harmonious agreement on the project, systling contraversies that threatened the success of the project herefore. This photo shows Secretary of the interior A. B. Pall (right) and Director A. P. Davis, of the Reclamation Service, at the Sin Diego hearing.
